**Product Bulletin
No. 14
Date: May 1, 2003**

Subject: New Product

Models: CS-BLB

BHS has introduced a new storage stand for **BLB-6000**, battery lifting beams. The storage stand can be used to store a **BLB-6000 Lifting Beam** or **FA-6, Fork Attachment & Lifting Beam Combination**.

OSHA/ASME requires that the lifting beam be stored when not in use.

ASME B30.20 Regulations state the following:

Section 20-1.4.3 Conduct of Lifting Device Operation

Paragraph (g)

- The operator shall land any attached load and store the lifter before leaving the lifting device.

Section 20-1.4.2 Qualifications

Paragraph (a) Item (5)

- Storage of the lifter required to protect it from damage.

Section 20-1.4-5 Miscellaneous Operating Practices

Paragraph (c)

- The lifter, when not in use, should be stored at an assigned location.
